

PROBLEM SOLVER

PROBLEM:

Ordinary cable slitters:

- Are too large for confined areas.
- Nick conductors.
- Leave uneven strip lengths.
- Have little or no adjustment for insulation thickness.
- Have exposed blades that create a safety hazard.
- Have limited range and uses.

SOLUTION:

Lawson Round Cable Slitter

- Fast and easy operation even in confined areas.
- Depth adjustment prevents conductor nicks.
- Provides a true, even cuts each time.
- Adjusts from 8 Ga. to 250 MCM.
- No exposed blade.

Scan Code To
See it in Action

FEATURES:

- Built-in wedge splits and removes insulation
- Adjustable blade for cable up to 4/0
- Blade swivels to slit cable
- Spring-loaded arm maintains pressure on insulation
- Extra slitting blade enclosed in handle
- Use on solid and stranded cable and wire
- Use for heavy cable and battery cable

APPLICATIONS:

- Solid conductor wire
- Stranded wire
- Synthetic tubing, vinyl tubing
- Industrial maintenance
- Electrical contractors
- Vehicle repairs
- Battery cable repairs

INDUSTRIES:

- Automotive
- Property Maintenance
- Manufacturing
- Warehousing

Adjust blade depth

Rotate slitter

Turn blade to slit insulation

Remove insulation
