

PROBLEM SOLVER

PROBLEM:

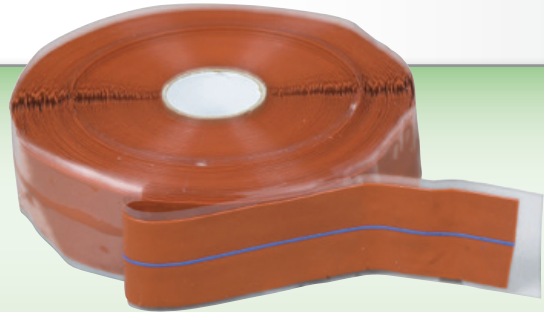

Most electrical tapes lose their adhesive properties over time.

- Moisture, chemicals, dust, and dirt can further deteriorate the wiring.
- Can have limited effective use outdoors.

SOLUTION:

Seal-Tite™ Fusion Wrap

- Self-sealing, high-dielectric insulating wrap
- Has no adhesives to break down.
- Fusion delivers a void-free homogenous wrap.
- Withstands acids, alkalis, salts, oils, and heat.
- Maintains its integrity over long periods of time.
- Resists abrasive particles found in industrial and outdoor applications.
- Flame Resistant
- Temperature range: -80 to 400°F

APPLICATIONS:

- High-current, high-voltage primaries
- Cable splices
- Welding cables
- Battery cables
- Harness wrap
- Tools
- Corrosive atmospheres
- Buss bars
- Motor windings

INDUSTRIES:

- Automotive
- Construction
- Equipment Rental
- Mining
