

PROBLEM SOLVER

PROBLEM:

Most sealants can't stand up to water and extreme weather.

- Concrete crack sealers that are not flexible, dry out, and crack easily.
- Crack sealers that don't stick to both sides of the concrete.
- Roof flashings sealed poorly causing leaks in roofs.

DRUMMOND®
A LAWSON PRODUCTS BRAND

SOLUTION:

Drummond® Stop-Gap Flexible Sealant and Flashing Compound

- Seals cracks in concrete and asphalt and keeps out water.
- Long-lasting, stays flexible, and stretches up to 450%.
- Bonds to almost any dry surface.
- Holds up to extreme temperatures: -80°F to 160°F (-62°C to 71°C)
- Seals roofs and roof flashings permanently.

APPLICATIONS:

- Roof repairs
- Flashing
- Installing gravel stops and reglets
- Cracks in sidewalks and walls
- Expansion joints
- Control and isolation joints
- Patching gutters and downspouts
