

PROBLEM SOLVER

PROBLEM:

DRUMMOND®
A LAWSON PRODUCTS BRAND

Most ice melters leave behind a damaging residue that can:

- Discolor carpets and floor mats.
- Corrode metal surfaces.
- Damage flooring surfaces.
- Degrade floor glass due to excess cleaning.

SOLUTION:

Drummond® Winter Rinse Floor Cleaner and Ice Melt Neutralizer

- Easily removes residue left behind by ice-melting compounds.
- May be used in carpet extraction machines to remove ice melt residue on carpets and floor mats.
- Safe on steel, aluminum, brass, and other metal surfaces — neutralizes corrosive residues.
- Compatible for use on nearly any water-safe flooring surface.
- Restores original gloss and won't damage floor finish.

APPLICATIONS:

- Daily floor cleaning of resilient and non-resilient tile, sealed marble, slate, terrazzo, ceramic, concrete, quarry tile, vinyl, and sealed wood floors.
- Removes hazy film left behind by alkaline floor cleaners.
- Neutralize floors after stripping old finishes to ensure good sealer and finish results.
- Remove hard water and uric acid (urine) deposits from washroom floors and grout lines.
