

Fiberglass Paint Booth Filters

Exhaust filters ensure the air leaving the spray booth is safe, and keeps paints and coatings from escaping. These filters are long-lasting and very efficient for all automotive paints and coatings. Changing the filters every two weeks is recommended to help prevent clogged filters, which can lead to overspray, and keeping paint from leaving the booth.

- High particle removal efficiency (over 99%)
- High overspray removal efficiency
- Great for waterborne coating applications
- Maximum filter longevity and holding capacity
- Maintains consistent air flow and booth balance
- 2.5" fiber structure and design
- 18g filter density

Meets or exceeds EPA Standard 40 CFR Part 63

Type	Size	Item No.	Pkg. Qty.
Pad	20" x 20"	1636261	50
	20" x 25"	1636262	50
Roll	20.5" x 100'	1636263	1
	25" x 100'	1636264	1
