

WHEEL WEIGHTS – Passenger Vehicles

Plasteel® – Plastic-Coated Steel

Plasteel® is a world first – A steel core wheel weight encased in a plastic outer shell. Engineered using forward thinking technology, Plasteel® is setting new standards for innovation in the industry.

- Hybrid Design - Steel core for strength encased in a plastic outer shell for scratch-free protection
- Scratch-Free Installation - Plastic outer shell acts as a buffer between the wheel weight and rim
- Corrosion Resistant - Has an OEM quality coating on the steel core along with a plastic outer shell for exceptional resistance

FN Type – Plastic-Coated Steel

Weight (g)	Item No.	Pkg. Qty.
5	1580273	25
10	1580274	25
15	1580275	25
20	1580276	25
25	1580277	25
