

Heavy Leveling Compound

Kent's Pro Essentials Heavy Leveling Compound is a high-quality blend of diminishing abrasives and low vapor pressure solvents that will allow enough working time to remove 1000 grit scratches from any painted surface. When used as directed, it will leave the surface leveled, clean and ready for the next step.

This product is intended to be the 1st step in the compounding process. A polishing and finishing product are recommended to be used after applying this product for optimal results.

Features

- Removes heavy imperfections
- Dust free
- Easy to use
- Body shop safe

Directions

Shake well before using. Work on a clean cool surface. Do not use in direct sunlight or on hot surfaces.

Use four small dots of Heavy Leveling Compound with a cutting wool or foam pad to level and flatten the scratches on an area 2'x2', at medium speed with a DA Polisher. Continue working in 2'x2' sections around the vehicle where needed.

Use any Kent Polish with a microfiber or foam polishing pad to increase depth and gloss.

As a final step, use any Kent Finishing product with a microfiber or foam finishing pad to protect the vehicle's painted surfaces.

Available Sizes

1. 16 ounce – 1636313
2. 1 Gallon – 1636314

Recommended Tools

- Tornador T21 Corded Polisher (1636433) or T21C Cordless Polisher (1636434)

Recommended Pads

- Blue foam compounding pad (1636436) or Wool compounding pad (1636435)
