CLEANING/DISINFECTING/MOLD CONTROL

POWERHOUSE (DR8690)

- Controls mold and mildew growth
- Cleans and disinfects in one step
- Kills E.coli bacteria and other disease causing pathogens found in floodwater, sewage and sludge
- Fresh fragrance leaves treated areas smelling clean
- Eliminates odor causing bacteria on carpets, carpet padding, subfloors, drywall, trim and frame lumber

DIRECTIONS: Dilute POWERHOUSE at a ratio of 2 fluid ounces per gallon of clean water. Remove heavy deposits of soil or mold growth. Using the pre-diluted solution, thoroughly wet surfaces to be treated with a clean cloth, mop, sponge, coarse spray or by soaking. Allow solution to remain on the surface for a minimum of 10 minutes. Rinse or allow to air dry.

Cleaner/Disinfectant

For cleaning, disinfecting and controlling mold and mildew growth

Packaging:

4 x 1 Gallons
5 Gallon Pails
20, 35 and 55 Gallon Drums

SAVVY SWIPES (DR8700)

- Pre-moistened towels in a bucket quickly kill bacteria and viruses that may be found in floodwater sludge and residue
- Controls mold and mildew growth on hard, non-porous surfaces
- Deodorizes as it disinfects, leaving treated surfaces smelling clean and fresh
- Perfect for disinfecting hand tools, utensils, steering wheels, door knobs and bathroom fixtures

DIRECTIONS: Remove heavy deposits of soil or grease prior to disinfecting. Thoroughly wipe down and wet surface to be treated. Allow to air dry.

Disinfecting Wipes

Convenient disinfecting with pre-moistened towels

Packaging:

65 Swipes per Bucket
6 Buckets Per Case

CLEANING/DISINFECTING/MOLD CONTROL

BREAKTHROUGH (DL1542)

- Extra strength concentrate safely powers through heavy, baked on buildups of sludge, sewage, silt, grease and oil
- Strong yet safe on most surfaces including glass, aluminum and painted surfaces
- Compatible with pressure washers, steam cleaning equipment and floor scrubbers, or can be applied by mop or scrub brush
- Ideal for floors, walls, building exteriors, walkways, driveways, construction equipment, trucks and stationary equipment

DIRECTIONS: Dilute BREAKTHROUGH at a ratio of up to 2 fluid ounces per gallon of clean water for light soil conditions (adjust to higher dilutions for heavier soil deposits). Premix solution in tank sprayer or mop bucket or apply using pressure washer/steam cleaner injection system. Spray diluted solution on surface and allow several minutes for chemical action to penetrate (do not allow solution to dry on surface). For difficult soil deposits, scrubbing with a deck brush will aid in cleaning. Rinse with clean water. For best results, pressure washer nozzle should be held 12" from surface. Rinse from top to bottom.

Pressure Wash Concentrate

Powers through heavy sewage and sludge deposits

Packaging:
5 Gallon Pails
20, 35 and 55 Gallon Drums
275 Gallon Totes

PERSONAL PROTECTION

NOW (DL4460)

- Safely sanitizes hands, killing 99.9% of germs within 30 seconds
- Entirely waterless system – no water or towels required
- Contains no alcohol for a safer, non-flammable sanitizer that won't dry skin
- Use to sanitize hands and prevent disease after cleaning and handling of flood damaged items

DIRECTIONS: Apply a generous amount of NOW foam to hands. Rub vigorously. Let air dry.

Instant Hand Sanitizer

Stay healthy when working in flood damaged areas!

Packaging:
50 ml Bottle, 25 Bottles Per Case

ODOR CONTROL

HIT MAN (DL4550-Liquid, DN5860-Sachet)

- Finds and destroys the source of damp musty odors through safe, oxidizing action
- Safe for room fogging in damp, water damaged areas or can be fogged through HVAC ductwork to eliminate musty odors in air handling systems
- Use to treat HVAC system equipment such as coils and drain pans
- Available in bulk liquid for spraying or fogging, and in convenient 30-day time release sachets for long term treatment

DIRECTIONS:

LIQUID - Using a tank sprayer or trigger sprayer, thoroughly wet surfaces to be treated. For larger areas, use a cold fogger on a wet mist setting and allow enough time for surfaces to be thoroughly wetted (one quart will treat approximately 400 square feet). Allow to air dry. For HVAC ductwork applications, fog HIT MAN into system intakes while system is running. Allow enough time for all surfaces to be wetted. One gallon will treat approximately 1500 linear feet of 2'x2' ductwork.

SACHET - Open foil outer pouch and remove sachet. Place sachet in centrally located area. In rooms with HVAC wall units, the sachet can be placed under the grate/cover to maximize circulation and effectiveness. One sachet will treat approximately 250 square feet. Replace sachet after 30 days.

The Odor Killer

Kills musty, damp odors caused by mold and mildew

Packaging:

Liquid – Quart Bottles
(6 and 12 Pack Cases)
4 x 1 Gallons
5 Gallon Pails
20, 35 and 55 Gallon Drums
Sachet – 200g Sachet,
6 Per Case

NIX FRESH (DL3870)

- Effectively eliminates odors caused by floodwater sludge, sewage, rotting food, and other organic matter
- NOT JUST A COVER UP – Active combination of bacteria and enzymes actually “eat” malodor sources, converting them to carbon dioxide and water
- Contains a light, fresh fragrance for immediate odor control

DIRECTIONS: Dilute at a ratio of 1:1 with warm, (not hot) clean water. Apply to pre cleaned areas by tank sprayer, trigger sprayer or by pouring directly on surface to be treated. Surfaces must be thoroughly wetted for NIX FRESH to be effective. Allow to air dry. Even after drying, NIX FRESH will continue to consume odor sources. Do not apply disinfectants or hot water to treated areas after applying NIX FRESH.

Biological Odor Control

Destroys sources of foul odors caused by floodwater

Packaging:

Quart Bottles
(6 and 12 Pack Cases)
4 x 1 Gallons
5 Gallon Pails
20, 35 and 55 Gallon Drums
