General requirements for securing loads and cargo are governed by The United States Department of Transportation Federal Motor Carrier Safety Administration (DOT FMCSA) Cargo Securement Standard. (393.100-393.136)

**Solution**

Utilizing the appropriate material handling equipment for the load

**Load Binder**
Lever Type 9200 lb. Safe Load
Item No. 98662

**Binding Chain**
Assembly Grade 70
Item No. 1586662

---

**DOT Regulation**

Each truck, truck tractor and bus must be equipped with fire extinguishers as provided in paragraph (g)*
- Three bidirectional emergency reflective triangles that conform to the requirements of Federal Motor Vehicle Safety Standard No. 125, §571.125 of this title; or
- At least 6 fusees or 3 liquid-burning flares. The vehicle must have as many additional fusees or liquid-burning flares as are necessary to satisfy the requirements of §392.22.

**Solution**

A kit with reflective triangles and flares

**3 Triangular Reflectors Kit**
Item No. 81633

---

**DOT/EPA Regulation**

EPA and the DOT have worked together to develop standards for the transporters of hazardous waste: EPA 40 CFR 263.31
Discharge Clean-up - A transporter must clean up any hazardous waste discharge that occurs during transportation or take such action as may be required or approved by Federal, State, or local officials so that the hazardous waste discharge no longer presents a hazard to human health or the environment.

**Solution**

Spill control products like absorbent pillows, socks, beads, granules and pads

**Spilfyter Universal Sorbent Kit**
Item No. SF11609

**Spilfyter Oil-Only Sorbent Sock**
Item No. DH6065
VEHICLE VISIBILITY
