

Garden Hose Lightweight Hybrid Polymer

Flexzilla® Garden Hose is engineered with a lightweight flexible hybrid polymer to lay flat and not kink under pressure. It is easy to maneuver around trees, bushes and other obstacles. Zero memory means the hose stays put without twisting and coils easily. A superior o-ring provides a long-term, leak-free connection at the spigot and the flexible hybrid polymer inner tube material is drinking-water safe.

- Extreme, all-weather flexibility
- Won't kink under pressure
- Lightweight, coils easily
- Durable, abrasion-resistant cover
- Leak-free o-rings
- Drinking-water safe
