

Magic Monkey Granular Absorbent

Magic Monkey is a lightweight, dry granular sorbent that is safe for use around people, plants and animals. Great for cleaning up fuels, oils, most chemicals and bodily fluids. It can be used in food processing facilities, and on many surfaces including concrete, tile and asphalt. Best used when poured beside the spill and then worked into the liquid with a stiff bristle broom. The granules will solidify the liquid so it can be easily swept away. Leaves your floors clean and dry to reduce slip hazards.
