

## Quick Seal Sprayable

A one-part, sprayable, modified urethane seam sealer that matches OEM sprayable sealers and can be painted and baked immediately after application. Applied with an air applicator gun, a variety of textures can be achieved using tooling and air flow pressure.

Adheres to primed or painted plastic body panels or bare metal surfaces. Extremely flexible, it can be used on vertical and horizontal surfaces. Sprays on easily and evenly to form a tough, water-resistant seal. Use on floor and trunk seams and to deaden sound.

- Non-sag formula
- Non-isocyanate formula

- Excellent adhesion flexibility and durability
- Use on primed or painted plastic or bare metal surfaces
- Paintable and bakeable immediately – best to paint within 72 hours
- Can be brushed on if needed
- Excellent adhesion to many surfaces including bare metal\*
- Glossy finish

\*For best results always follow OEM recommendations for priming procedure
