

TPMS Service Kits

It is industry standard to repair or replace valve stems when a tire is being mounted to ensure a high-level of vehicle safety. The universal TPMS service kits offer a simple solution with a minimum amount of items.

- The U1 kit works for 97% of the metal valve stem TPMS sensors in the market
- The U2 kit works for 75% of the rubber snap-in valve stems TPMS sensors in the market
- Service Kits H02, S12, C11 and O02 fill the gaps in the program to offer complete market coverage
- The TPMS Service Kit Assortment, Item No. CT4000, offers 99% market coverage – includes all six service kits in a KA9 drawer

For best results, utilize the TPMS Service Kit Application Guide
