

Technical Data Sheet

Wither LVP Non-Selective Weed Killer

DRUMMOND™
A LAWSON BRAND

Overview

Wither LVP kills weeds, grass and vegetation on contact by attacking the foliage and the root system. Most weed killers only kill the foliage, but Wither LVP is also a soil sterilant that prevents seed germination and plant regrowth for the entire season. Wither LVP is ideal for controlling weeds along fences, rail sidings, power line towers, sidewalks, driveways and any location with unwanted weeds.

Features/Benefits

- Ready to use
- Non-selective herbicide
- Soil sterilant prevents regrowth
- Quick knockdown
- Kills annual and perennial weeds
- Kills annual and perennial grasses
- Kills woody plants

Applications

- Fence rows
- Non-crop areas
- Parking lots
- Railroad sidings
- Storage yards

Method of Application

- Apply with an appropriate metal solvent-resistant portable spray pump, tank sprayer, air siphon sprayer or solvent trigger sprayer

Identification

- Amber liquid with aromatic petroleum odor.

Sizes

- 4 x 1 Gallon (DR9110 04)
- 5 Gallons (DR9110 05)
- 20 Gallons (DR9110 20)
- 55 Gallons (DR9110 55)

Directions for Use

- Note: It is against the law to use this registered product in a manner inconsistent with its labeling.
- Spray using a coarse spray with appropriate applicator
 - See product label for complete directions

Technical Specifications

- Form: Thin liquid
- Color: Amber
- Odor: Petroleum/solvent
- Water Solubility: Insolubility
- Flash Point (TCC): 140°F (60°C)
- Specific Gravity: 0.90 at 70°F (21°C)
- Reportable VOC Content: None
- Shelf Life: Minimum one year
- HMIS: H:2 F:2 R:0
- EPA-Registered Pesticide
- EPA Reg. No. 10807-204-40208
