Subject: Letter of Guaranty – **Food Grade Silicone** (19915)

To Whom It May Concern:

Food Grade Silicone is acceptable as a lubricant with incidental food contact (H1) for use in and around food processing areas operating under the Federal meat and poultry products inspection program. **Food Grade Silicone** may be used on food processing equipment as a protective anti-rust film, as a releasing agent on gaskets or seals of tank closures, and as a lubricant for machine parts and equipment in locations in which there is a potential exposure of the lubricated part to food. The amount used should be the minimum required to accomplish the desired technical effect on the equipment. If used as an anti-rust film, the compound must be removed from the equipment surface by washing or wiping, as required to leave the surface effectively free of any substance which could be transferred to food being processed.

Should you have any questions or need additional information, please contact the Regulatory Affairs Department at the number listed below or at the e-mail address regulatoryaffairs@lawsonproducts.com.

Sincerely,

Heather Buck
